Quality Systems for Regulatory Review at Health Canada

November 7, 2012

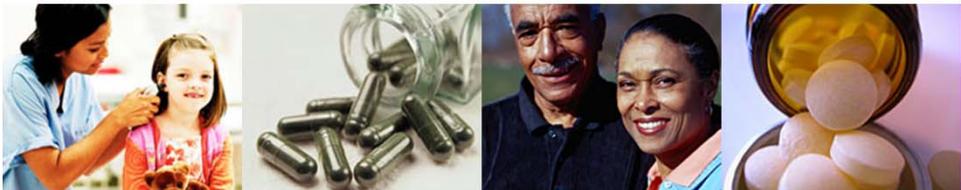

Caroline Vanneste, GRP Project Manager

Canada

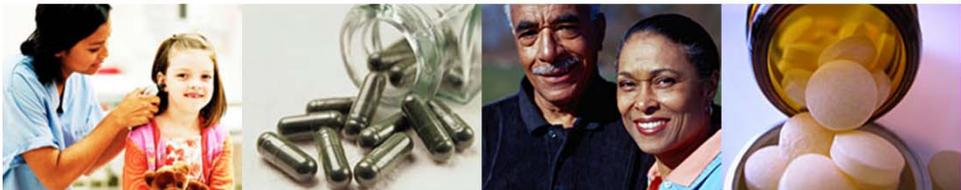

Health Canada GRP Project

- The Therapeutic Products Directorate Good Review Practices project (for [human medical devices and pharmaceuticals](#)) was launched in 2004
- It is not (yet) a formal Quality System
- The development of Standard Operating Procedures (SOPs) is a large part of the GRP Project

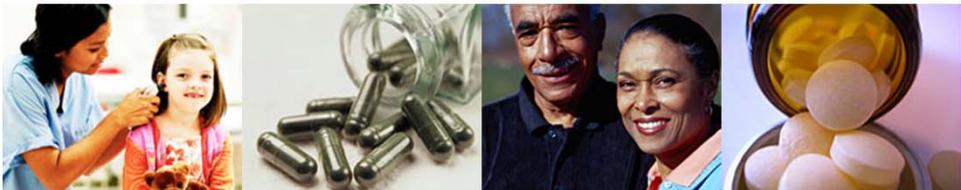

Scope of Review SOPs

- SOPs provide instructions for reviewers on how to prepare regulatory review reports for medical device and drug applications (*Say What You Do*)
- Different SOPs apply to different
 - stages of development (e.g. investigational testing versus marketing authorisation),
 - application types (e.g. generic versus innovative drugs),
 - types of review (e.g. clinical versus manufacturing),
 - etc.

Content of Review SOPs

- General information on purpose, scope, responsibilities, etc.
- General instructions on preparing reports (e.g. which template to use, formatting, etc.)
- Scientific and regulatory instructions on preparing reports
- Links to report templates

STANDARD OPERATING PROCEDURE
(SOP Template Version 3.1: Effective Date 2011-10-01)

| | |
|---|---|
| Title: [Title of Standard Operating Procedure] | Doc. Number: [Short code #] Version: [Version #] Review Date: [Date to be reviewed (usually 2 years) yyyy-mm-dd] |
|---|---|

| | | |
|---|---|--|
| Bureau / Office: [acronym] Area: [division or group] | Status: [in development/draft/final] [in development/draft date] | Effective Date: [Date for coming into operation, yyyy-mm-dd] |

| [Completion date of the report.] |

**Subject/
Objet:**

[Title of Template]

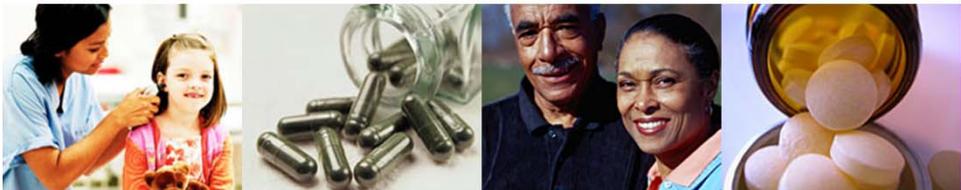

[code and version number: Effective date: [yyyy-mm-dd]]

| | |
|---|--|
| Brand or Product Name of Drug Product | |
| Proper or Common Name of Drug Substance | |
| Manufacturer / Sponsor | |
| Therapeutic Classification | |
| Dosage Form(s) and Strength(s) | |
| Route(s) of Administration | |
| Type of Submission | |
| TPD Target Date | |
| Control Number / File Number | |
| Date NOC/c Issued / International Birth Date | |

| | |
|--|--|
| Parts of Submission Reviewed in this Report | |
| Review Period | |
| Reviewer Recommendation | |

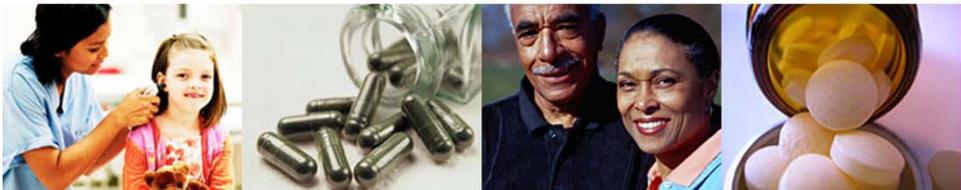

Examples of SOPs

- Preparation of the Scientific Review Report for Medical Device Licence Applications
- Using the Pharmaceutical Safety and Efficacy Assessment Templates (PSEATs) to Prepare Reports on Submissions for Marketing Authorizations

Review Reports

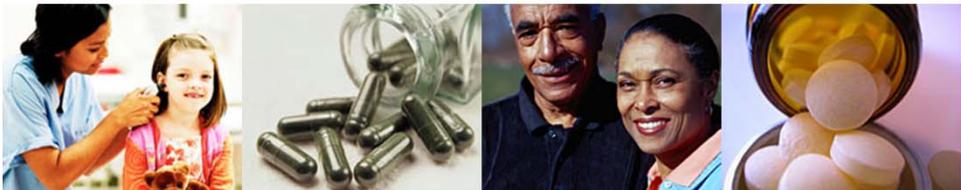

- All review reports are prepared using the report templates, following the instructions in the associated SOP (*Do What You Say*)
- Managers read the review reports and make final recommendations on the applications

Auditor General Findings, Fall 2011

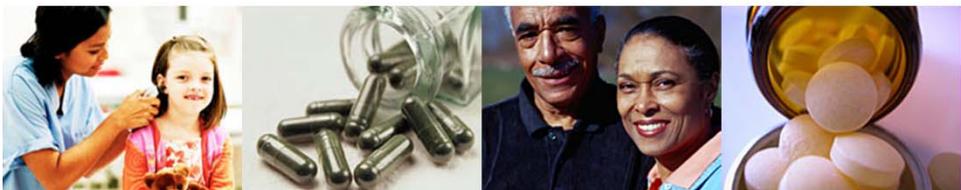

“We found that the Department has the following **key components of a quality assurance system**:

- standard operating procedures,
- guidelines for drug reviewers,
- review templates,
- training programs, and
- management review of individual files.”

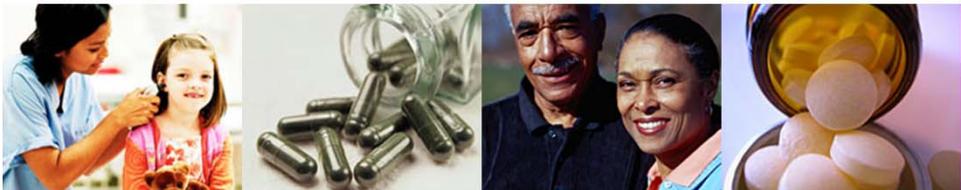

Auditor General Findings (2)

“However, we also found that Health Canada **has not assessed whether review procedures, guidelines, and templates were consistently interpreted and applied** across the four different review bureaus responsible for conducting reviews of drug submissions.”

Auditor General Recommendation

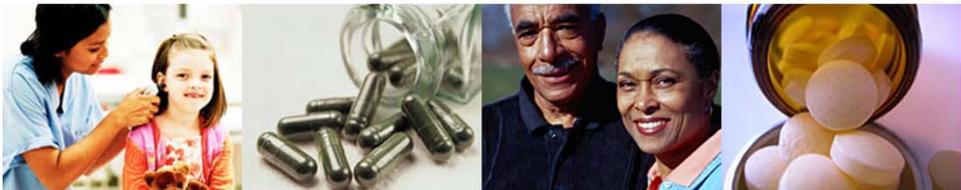

“Health Canada **should regularly assess whether the procedures and guidelines**, which were established to ensure timely, consistent, and high quality review decisions, **are interpreted and applied consistently** by all four review bureaus.”

Health Canada Response

“The Department **will develop a system** to regularly assess and ensure the use of procedures... by 31 December 2012.

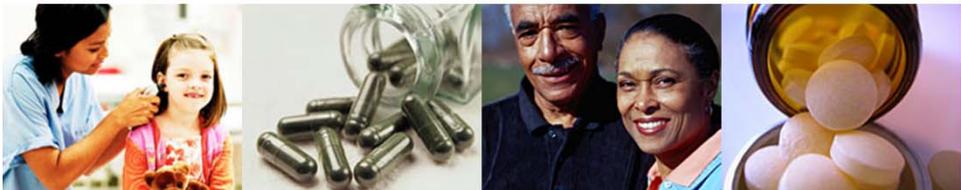

Implementation of the system, which will include **assessment of compliance with procedures and consistency of interpretation...and necessary corrective mechanisms**...will be completed by 31 December 2013.”

Developing the System

Health Canada's new [SOP Audit Program](#) contains

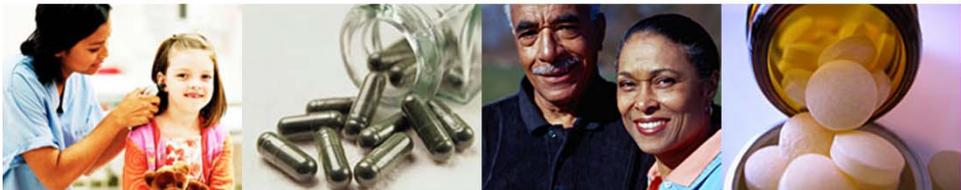

- the objectives of the program,
- the roles and responsibilities of the program manager,
- the scope of the program (i.e. review SOPs).

Developing the Plan

We are currently developing our **PSEAT SOP Audit Plan**, which will contain

- audit scope and objectives,
- criteria for evaluation,
- schedule and sampling strategy,
- reporting strategy (*Prove It*),
- approval and monitoring strategies (*Improve It*).
