Note 1: Sources of Information: Investigation Bureau, Ministry of Justice; Criminal Investigation Bureau, National Police Administration; and the Armed Forces Police Command. Military Police Command

Note 2: The above information is based on statistical information obtained at the indicated times, and may have changed slightly after case closures.

Note 3: Percentages are calculated by dividing the sum of the units for each substance by the total sum for all substances.

Note 4: "—" indicates that, due to a lack of individual cases, a percentage increase/decrease for the same timeperiod during the previous year cannot be calculated.

Note 5: In order to have the same statistical method with other countries, the calculation of drug weight has been changed to net weight of current appraisal since January 2006. Among them, the weights of non-synthesized drugs such as opium, schedule 1 drug opium poppy, cocaine and cannabis, schedule 2 drugs, are counted by net weight.
