Ways of labeling of contents of vitamins, minerals and other nutrients under the following provisions, and numbers shall be expressed in Arabic numerals: Use “per one serving (or per serving)” and the provided “daily percentage of reference value” for labeling, and the number of servings contained in each package of the product shall also be specified. Labels shall also be specified the daily nutrient intake reference value if the daily nutrient intake reference value has been set. For products without a set daily nutrient intake reference value, the “ * ” symbol shall precede the daily percentage reference value line and clearly note “*Reference value not set.”
5. Daily nutrient intake reference values and measure units shall be labeled according to Appendix 1. Other nutrients not listed in Appendix 1 are expressed using the metric system or their common symbols.
6. The contents of vitamins, minerals and other nutrients shall be labeled in metric units. For Vitamins A, D and E, the contents shall be additionally

labeled in IU.
