### IV Attestation

I, the undersigned Official Veterinarian do hereby certify that:

- 1) the milk and milk products described above were derived from animals born and raised in Finland or in another European Union Member State;
- 2) the milk and milk products were derived from animals that were in a good general state of health and that did not show any symptoms of infectious diseases communicable to humans through milk. The delivery of raw milk from the production holding was not restricted due to OIE-listed diseases at the time of milking and milk collection;
- 3) Finland is free from Foot-and-mouth disease, Rinderpest, Peste des petits ruminants, Contagious bovine pleuropneumonia, Lumpy skin disease, Rift Valley fever and Sheep pox and Goat pox according to the OIE Terrestrial Animal Health Code;
- 4) Finland is recognized as a country with negligible BSE risk according to the BSE Chapter of the OIE Terrestrial Animal Health Code;
- 5) the milk and milk products were manufactured at (an) establishment(s) and stored at (a) store(s) that have been approved and that are under the supervision of the competent authority of Finland;
- 6) the milk and milk products were handled, produced, packed and stored under sanitary conditions in accordance with the European Union and Finnish legislation on public health requirements;
- 7) the products were not contaminated by pathogens of animal contagious diseases during the receiving of raw material or the manufacturing, processing, transportation and storage of the products;
- 8) the production process of the milk and milk products included pasteurization for 15 seconds at a minimum of 72 °C or a treatment of at least equivalent effectiveness. The treatment is according to the OIE Terrestrial Animal Health Code effective to manage the possible risks associated with Tuberculosis, Brucellosis and Anthrax;
- 9) the milk and milk products were at the time of loading in perfect condition, suitable for human consumption and free from contagious animal diseases;
- 10) Finland implements an official testing program for harmful organisms, veterinary drug residues and other toxic substances. The results of the tests meet European Union performance standards and have not provided any evidence as to the presence of chemical/drug residues or toxic substances or harmful organisms in this consignment which could be harmful to human health; and
- 11) radioactivity and hormone residue levels of the milk and milk products are below the maximum limits regulated in the European Union and Finnish legislation. The use of hormones as growth promoters or to increase milk production is banned in Finland.
