

Sanitation Standard for the Microorganism in Canned Foods

Article 1

This Standard is prescribed in accordance with the provisions of Article 17 of the Act Governing Food Safety and Sanitation.

Article 2

Canned foods packed in metallic containers shall pass inspection by incubation test (37°C for 10 days) and free of microorganisms capable of reproducing under normal storage conditions.

Article 3

Canned foods packed in retort-pouch shall pass inspection by incubation test (37°C for 10 days) and free of microorganisms capable of reproducing under normal storage conditions.

Article 4

Canned foods packed in glass bottles shall pass inspection by incubation test (37°C for 10 days) and free of microorganisms capable of reproducing under normal storage conditions.

Article 5

This Standard shall be implemented at release date.
