What you should do

If you think you became sick from consuming a recalled product, call your doctor.

Check to see if you have recalled products in your home. Recalled products should be thrown out or returned to the store where they were purchased.

Food contaminated with *E. (Escherichia) coli* O157:H7 may not look or smell spoiled but can still make you sick. Symptoms can include nausea, vomiting, mild to severe abdominal cramps and watery to bloody diarrhea. In severe cases of illness, some people may have seizures or strokes, need blood transfusions and kidney dialysis or live with permanent kidney damage. In severe cases of illness, people may die.

- [View our detailed explanation of the food safety investigation and recall process \(/food/information-for-consumers/food-safety-system/basic-html/eng/1374439778888/1374821384212\)](/food/information-for-consumers/food-safety-system/basic-html/eng/1374439778888/1374821384212)

Background

This recall was triggered by CFIA (Canadian Food Inspection Agency) test results. The CFIA (Canadian Food Inspection Agency) is conducting a food safety investigation, which may lead to the recall of other products. If other high-risk products are recalled, the CFIA (Canadian Food Inspection Agency) will notify the public through updated Food Recall Warnings.

The CFIA (Canadian Food Inspection Agency) is verifying that industry is removing recalled product from the marketplace.

Illnesses

There have been no reported illnesses associated with the consumption of these products.
