The products subject to recall bear establishment number "EST. 40238" or "EST. P-40238" inside the USDA mark of inspection. These items were shipped to institutions in Idaho, Montana, Oregon, and Washington.

The problem was discovered on May 16, 2017 when the city of Airway Heights notified the establishment that the May 8, 2017 water sampling of several wells, which supply the municipal water system, demonstrated chemical contamination. The city of Airway Heights issued an advisory health alert to not drink or use the water for cooking purposes because the water contained elevated levels of fluorinated organic chemicals, Perfluorooctanesulfonic acid (PFOS) and Perfluorooctanoic acid (PFOA), above the Environmental Protection Agency Lifetime Health Advisory (HA) levels.

There have been no confirmed reports of adverse reactions due to consumption of these products. Anyone concerned about an injury or illness should contact a healthcare provider.

Consumers who have purchased these products are urged not to consume them. These products should be thrown away or returned to the place of purchase.

FSIS routinely conducts recall effectiveness checks to verify recalling firms notify their customers of the recall and that steps are taken to make certain that the product is no longer available to consumers.

Consumers with questions about the recall can contact Michael Cline, industries manager, at (509) 244-4232. Media with questions about the recall can contact Lindsey Konrad, public information officer, at (360) 529-6091.

Consumers with food safety questions can "Ask Karen," the FSIS virtual representative available 24 hours a day at AskKaren.gov or via smartphone at m.askkaren.gov. The toll-free USDA Meat and Poultry Hotline 1-888-MPHotline (1-888-674-6854) is available in English and Spanish and can be reached from 10 a.m. to 6 p.m. (Eastern Time) Monday through Friday. Recorded food safety messages are available 24 hours a day. The online Electronic Consumer Complaint Monitoring System can be accessed 24 hours a day at: <http://www.fsis.usda.gov/reportproblem>.

USDA Recall Classifications	
Class I	This is a health hazard situation where there is a reasonable probability that the use of the product will cause serious, adverse health consequences or death.
Class II	This is a health hazard situation where there is a remote probability of adverse health consequences from the use of the product.
