---

## Risk

The presence of Campylobacter in the products. The usual symptoms caused by Campylobacter are fever, diarrhoea and abdominal cramps.

---

## Our advice to consumers

If you have bought any of the above products do not eat them. Instead, return it to the store from where it was bought for a full refund.

---

## Action taken by the company

Tesco is recalling the above products. Point of sale notices will be displayed in all retail stores that are selling these products. These notices explain to customers why the products are being recalled and tell them what to do if they have bought the product. Please see the attached notice.

---

## About product recalls and withdrawals

If there is a problem with a food product that means it should not be sold, then it might be 'withdrawn' (taken off the shelves) or 'recalled' (when customers are asked to return the product). The FSA issues Product Withdrawal Information Notices and Product Recall Information Notices to let consumers and local authorities know about problems associated with food. In some cases, a 'Food Alert for Action' is issued. This provides local authorities with details of specific action to be taken on behalf of consumers.
