

Control Instructions for Australian Dairy Products

1. Shall be derived from establishments on the list of establishments certified by the Australian government and attached with the original sanitary certificate (for milk and milk products, copies are acceptable), and the sampling rate is 2%.
2. Confirm the list of establishments certified by the Australian government directly with the exporting company or the Australian authorities.
3. Fill in the number of the sanitary certificate in the attachments field.
4. Fill in the establishment code in the establishment code field.
